The AUTOFRIDGE eutectic refrigerator/freezer

39 and 73 Litre sizes

12 and 24 Volt operation

240V Power supply available

Available from Quirks

Ph (02) 9700 0960

● As a EUTECTIC REFRIGERATION SYSTEM

The **AUTOFRIDGE** is run for a total of 5-6 hours per day - usually split into two separate running periods of 2 hours in the morning and ~3 hours in the afternoon. The **AUTOFRIDGE** is turned 'OFF' in the interim. Average daily power consumption for this mode of operation is ~20Ah/day @ 12V.

● As a CYCLIC REFRIGERATION SYSTEM

The **AUTOFRIDGE** is set on a refrigeration setting (e.g. '2') on the thermostat and left to cycle 'on and 'off' throughout the day. Average daily power consumption for this mode of operation is ~24Ah/day @12V.

● As a CYCLIC FREEZER

The **AUTOFRIDGE** is set on one of its sub-zero settings ('5', '6' or '7') on the thermostat - the higher the setting, the colder the **AUTOFRIDGE** will cycle - and left to cycle 'on' and 'off' throughout the day. Average daily power consumption for this mode of operation is ~40Ah/day @ 12V.

*Quotes from Gerd Hurst-
Operations Manager,
Odyssey Tours & Safaris
Northern Territory Australia.*

*"Our company spends over
300 days a year in the
outback and we rely on the
Autofridge."*

*"We can sit for days
running the Autofridge
without worrying about
flat batteries."*

*"The Autofridge can cope
with high ambient temper-
atures day in and day out."*

*"We are proud to use a
product that is made and
designed in Australia to
suit our unique conditions."*
